Part D- Case to support application

Please provide as much information as possible to support your application. Include details of the measures or circumstances that mitigate biosecurity risks to the State of Western Australia. Refer to the [Guidelines to importing and keeping regulated animals in Western Australia](#) for further information.

Suggested details may include:

Indoor Housing

Birds must be kept in secure enclosures with a double-door entry system to prevent escape.

Enclosures must meet wire and mesh minimum standards applicable to the species.

Enclosures should be mounted on a secure stand with lockable doors to prevent escape.

Outdoor Housing

Birds must be kept in secure enclosures with a double-door entry system to prevent escape.

Enclosures must meet wire and mesh minimum standards applicable to the species.

Aviaries and enclosures should be securely fastened to a concrete base or pegged to the ground, with netting and post uprights buried at least 300 mm into the ground.

Structural Requirements:

Aviaries and enclosures must use appropriate load-bearing materials within the framework:

- Timber: 50 mm x 50 mm
- Angle iron: 25 mm x 25 mm x 3.17 mm
- Steel rod: 12 mm internal diameter

Additional Measures

- Wire netting laid under breakable sheet coverings such as PVC or fiberglass.
- Fine mesh to prevent contact or predation by wild birds and vermin.
- Birds must not be allowed to walk or fly outdoors.
