1 = 1 ear tag per animal; 2 = Require 2 ear tags per animal; 3m = 3 months control of buffalo flies; 4m = 4 months control of buffalo flies in OP-resistant and SP-resistant buffalo flies

WHP = With Holding Period for milk and meat (days)

ESI = Export Slaughter Interval (NYE=Not Yet Established)

NA = Not Applicable

DISCLAIMER: We have no evidence that cattle ear tags registered for use against buffalo flies across Australia will have the same impact on stable flies. These products claim use against organophosphate - resistant and synthetic pyrethroid resistant buffalo fly populations. Given that they are registered for 3-4 months control they may be a worthwhile and cost-effective method of control, particularly when only 1 tag is required per animal.
