Carbon Farming Service Provider Directory

Anyone new to carbon farming and the Australian Carbon Credit Unit (ACCU) Scheme should seek professional advice to determine project feasibility, planning and design, and for assistance with the technical and regulatory requirements of registering the project. There are also opportunities from insetting within the supply chain using carbon credits and the emerging biodiversity credit markets.

The advice depends on the type of project, the landowner's knowledge and experience, property size, location, and business structure. Services range from project planning, technical soil analysis, project management, site mapping to plant species selection.

The Department of Primary Industries and Regional Development (DPIRD) has compiled this Service Provider Directory to connect landholders with advisors.

Inclusion in this Directory is voluntary and is not an endorsement of the organisation or individual. To be added to the list, Service Providers email carbonfarming@dpiird.wa.gov.au.

DPIRD has not fully assessed or verified the businesses' ability to provide the services listed. Users make their own assessment with respect to the relevance, appropriateness, and suitability of the provider and undertake their own due diligence. DPIRD does not take responsibility for errors or omissions in the information provided.

Service Provider Qualifications & Experience

Carbon Project Development & Management

- Are they a signatory to the **Australian Carbon Industry Code of Conduct**?

The Carbon Market Institute administers the Australian Carbon Industry Code of Conduct. **A list of current signatories** is on its webpage.

- Anyone giving financial advice (i.e. ACCU price, trading options) must hold a current **Australian Financial Services Licence** (AFSL).

The Australian Securities and Investments Commission is responsible for administering the AFSL regime and keeps a searchable **professional register** of all AFSL holders.

- Can they provide examples of successful projects established with landholders like you?
- Do they have up-to-date software and mapping capabilities?

Agribusiness Advisors and Agronomists

- Are they a member of the Australian Association of Agricultural Consultants of WA AAAC?

A **list of consultants** and area of expertise is found on the AAAC [WA] website.

- Do they have suitable qualifications and experience?

Environmental and Revegetation Consultants

- Is the consultant a member of the Environmental Consultants Association (WA) Inc. (ECA) or the Revegetation Industry Association of WA?

The Environmental Consultants Association (WA) Inc. is the lead professional body representing commercial environmental consultants throughout WA. It provides a list of 160 registered consultants to **search via their area of expertise**.

The Revegetation Industry Association of WA also provides a **directory of members**.

Natural Resource Management, Land Care and Grower Groups

- Do the staff hold suitable qualifications and experience?
- Can they provide examples of projects they successfully established in your region?
- Do they have up-to-date software and mapping capabilities?

Soil Technicians and Laboratories

- Is the soil technician experienced in collection and handling of samples for organic carbon and bulk density analysis?
- Is the spectrometer technician experienced in the Clean Energy Regulator's requirements for the spectrographic device settings and the sampling process and analysis?
- Does the laboratory have the relevant Australasian Soil and Plant Analysis Council (ASPAC) certification and National Association of Testing Authorities (NATA) accreditation?

The **soil carbon method** requires ASPAC certification for Total Carbon method 6B2 and Total Organic Carbon method 6B3, and NATA accreditation for organic carbon, bulk density and moisture analysis. **ASPAC** and **NATA** list laboratory status on their websites.

Service Provider Categories

Carbon Project Developers

Agriprove
